\_\_\_\_\_

# EDUCATION

**Software Engineering** Bootcamp HyperionDev | Dec 22 - Apr 23

Front End Developer

Bootcamp EdX | Dec 22 - Apr 23

Strategic Branding Identity and Brand Experience Short Course UAL St Martin's | Jul 21

**Cert. Professional Marketing** [Merit] CIM Marketing Sep 15 - Jun 16

Visual Communications Degree (2:1) B'mouth Uni Sep 10 - Jun 12

# SUMMARY

A resilient and growth-oriented Front-End Developer, with experience in Python, Javascript along with popular frameworks, seeking a junior position where I can apply my eight years of experience in brand, design and marketing, to help create products that function, look great and have a purpose.

## **EXPERIENCE**

Front End Developer [Bootcamp]

EdX | Dec 22 - Apr 23

- # Became proficient in Javascript, Node and React through a 16 week intensive course, by applying their curriculum alongside independent study and self-directed problem solving.
- # Able to comprehend and implement new knowledge at speed. Scoring 100% and meeting all criteria for each weekly challenge..
- # Progressed from writing basic loops and function through to confidently writing fetch requests, promises and now gearing up to OOP methodology

#### Software Engineer [Bootcamp]

HyperionDev | Dec 22 - Apr 23

- # Developed a practical application for the Python language, by committing to over 360+ hours of practical study, I can now confidently navigate through data types and manipulate data structures, test, debug and refactor my own code at a junior level.
- # Received full marks and obtained a high score of 98% for the completeness, efficiency, style and documentation across 50 projects. Demonstrating a high-level of comprehension and self-discipline for reading technical documentations and writing the programs to brief, of which I was frequently praised for excellent code readability.
- # Secured one of the 5,000 places from a pool of 200,000 applicants, by solving a series of althogisms which assessed my problem-solving capabilities and mindset.

# **PROJECTS**

#### **Pool Position |** Wild Swimming Directory

# Designed and built a directory for wild swimming spots in the UK. Part of a group project for two weeks, I was responsible for accessing data from a weather API, dynamically creating the cards, and problem solving the logal storage logic.

Javascript RESTful API's Bootstrap
Idea Creation Teamwork

#### **Stock Inventory |** Shoe Store Inventory Simulation

# Designed and wrote a stock inventory program using OOP and defensive coding methodologies in Python.

The program accesses external file data which can be read and updated,

Python OOP Defensive Coding

#### Book Store | SQL Database

# Designed and built a directory for wild swimming spots in the UK. Part of a group project for two weeks, I was responsible for accessing data from a weather API, dynamically creating the cards, and problem solving the logal storage logic.

Python SQL

## **EXPERIENCE**

### Head of Brand & Design

Tileyard London | Feb 21 - Dec 22

- # Wrote and presented to the board of directionors, a new brand strategy designed to unify the individual pillars of the business, by upskilling to meet business needs and redefining and upholding the businesses and community core values and mission.
- # Conducted process workshops to understand the full scope of the business requirements with follow up workshops to map out business operations on how to achieve these objectives.
- # Coordinated the marketing team of three and mentored a Marketing Assistant to become more confident and independent in their responsibilities.
- # Designer and brand guardian for all marketing material, environmental signage.

#### Campaign Manager

Coutts Private Bank | Dec 22 - Apr 23

# Developed a practical application for the Python language, by committing to over 360+ hours of practical study, I can now confidently navigate through data types and manipulate data structures, test, debug and refactor my own code at a junior level.
